Extend Your Ground Beef with Advanced Food Systems®

Ground beef represents a substantial portion of total beef sales in the U.S. market. This statistic combined with diminishing supply, foretells elevated costs to the processors of cooked ground beef. **AFS** has an effective answer which will improve the quality of your product and raise your bottom line.

SRM GB-16 is the solution for beef processors looking to reduce costs and/or extend ground beef. This marinade is easy-to-use, whether hydrated or dispersed as a dry ingredient on raw ground beef prior to cooking in a kettle or other types of mixers.

SRM GB-16 provides the following **benefits** in ground beef:

- Improves texture – more tender and juicy, less mealy
- Cost savings through increased cook yield and extended beef
- Prevents/reduces fat oxidation
- Reduces fat separation
- Prevents "fat capping" in chili or meat sauces

SOLUTIONS CENTER

Ground beef prepared with SRM GB-16 can be used in various applications including:

- ✓ Beef chili
- ✓ Meat sauces, gravies and stews
- ✓ Beef fillings for tacos, burritos and raviolis
- ✓ Beef pizza toppings
- ✓ Ground beef for frozen entrees.

At Advanced Food Systems, we strive to provide our customers with technology based long term solutions which improve texture and flavor as well as maximize yield and profits.
