## ADVANCED FOOD SYSTEMS

### RCW Wings Systems

**Sealtite® RCW** and **Seal 'N Crisp® RCW** are the most recent chicken wing development from the R&D team at AFS.

The **RCW** system gives an end-user the ability to reheat fully-cooked, frozen wings under numerous conditions without impacting appearance in both commercial and at-home heating conditions.

#### POSSIBLE REHEATING METHODS INCLUDE:

- **Deep Fryer**
- **Home Oven**
- **Convection Oven**
- **Rapid Cook Oven**
- **Pizza Oven**
- **Air Fryer**

Together, these products provide neutral roast chicken flavor with a crisp, honey brown color. Whether served as is, with any condiment or with a topical seasoning, the RCW chicken wings are sure to please any chicken wing aficionado.

The versatile **RCW** wing system has potential applications to food service, retail, convenience stores, and quick service restaurants. Wing appearance is uniform and maintains a tender and juicy texture, regardless of reheating method or wing size.

Please contact AFS for glaze-free Buffalo, BBQ, Gluten-free or clean label wing systems.
