## What's New! from AFS

### Looking to Put Ever-Increasing Dairy Ingredient Costs to a Halt?

*We have just the solution for you!*

**Our Read Cream® and Milk Plus™ Product Lines replace Dairy Ingredients and provide significant cost reductions!**

Our **Read Cream®** and **Milk Plus™** product lines are specially-designed dairy powder systems used to replace Heavy Cream (**HC**), Half & Half (**HH**), milk, and other dairy/non-dairy products, thus significantly reducing cost.

**Read Cream®** rehydrates easily in hot (below 160 deg F), warm, or cold water. It also provides creamier and more stable sauces than regular Heavy Cream or Half & Half. A ready-to-use solution can be prepared just before making sauces, soups and bakery products. In addition, our **Read Cream®** products can be dry-blended with other ingredients (seasoning, flavors, thickeners, etc.) before being added to a batch.

**Our Milk Plus™** products, when *hydrated in whole milk*, can be used as a 1:1 replacement for heavy cream in sauces, soups, and bakery

products. The finished product is similar in flavor, mouth-feel, and color to heavy cream and is significantly lower in cost. **Milk Plus™** is a dry system that requires no refrigeration. It can also be hydrated in water, thereby contributing dairy flavor with significant calorie reduction in the end product.

**What about Reducing Fat Content of your products while cutting cost?** Both **Read Cream®** and **Milk Plus™** will do just that! **Read Cream® HC-22** for example, has approximately 82% less fat compared to Liquid Heavy Cream; **Read Cream® HH-60** has about 56% less fat compared to Liquid Half & Half; and **Milk Plus™** has approximately 74% less fat compared to Liquid Heavy Cream.

**Read Cream®** and **Milk Plus™** are some of many products carefully designed and manufactured by our R&D, Technical Service, and Production teams, whose experience and expertise provide our customers with creative culinary experiences as well as the latest advances in Food Science and Technology. We help our customers with Improved Texture and Flavor, Lowered Costs, Improved Process Control, and Development of New Products in our state-of-the-art manufacturing facility and R&D laboratory and kitchen.

Whether your needs are for products or cost improvements, new product development, or value-added functional ingredient systems, we are ready to turn your project into a success. Advanced Food Systems, Inc.: Providing the **Right Balance of Texture and Flavor.**
