AFS products and hand-held foods go hand-in-hand!

People are on the go! Consumers are demanding healthy, portable foods that offer quick preparation and easy clean-up. Whether the items are sweet or savory, AFS offers innovative products to improve the texture and filling stability of hand held foods, including egg rolls, taquitos and filled crepes.

Ethnic egg roll flavor profiles like Thai Shrimp Egg Rolls utilize shrimp treated with **Tenderbite™ 3525LS** to improve cook yield, retain color and improve texture. **Actobind® 3900** binds water and prevents filling blow-out. Modern egg roll fillings such as Breakfast Egg Rolls feature scrambled eggs cooked with **EggRite™ 16**, **Chef-Ready™ Seasonings** and **AFS Salt Replacers**. Combinations such as these provide high quality flavor and nutrition for convenience oriented consumers while extending yield, improving texture and providing excellent flavor.

Tacquito tortilla texture and machine-ability are improved by **Actobind® EPS**. **Sealtite® FB17** is an effective, edible sealant with a broad range of applications that prevents unwrapping. Freeze thaw stable sauces, such as **Chef-Ready™ Monterey Jack Sauce CM #16**, provide distinct flavor for taquitos while offering the benefit of a low / reduced sodium label.

Fillings can be made more cost effective and flavorful by including **Easy Brown Onions™**, chicken meat marinated with **Actobind™ CTS-10** or ground beef cooked with **Actobind™ GB14**. Each of these products improves texture, increases yield and maintains consistency throughout

production and reconstitution. **AFS Flavor Boosters™** can be added to reduce the amount of expensive components, such as cheese, while improving flavor.

Actogel™ products are an effective agent to control water migration in fruit fillings. **Actobind™ 3924** provides freeze thaw and emulsion stability to fillings while **Actobind™ 9021** stabilizes ricotta cheeses and improves baked texture; both prevent blow-outs or runny fillings. Cost control is further assisted by using **ReadiCream®** as a direct replacement of Heavy Cream or Half & Half.

The hand-held food market is continuing to grow. AFS provides customized solutions in a wide range of flavors that enhance quality and provide cost savings.
